BRAND & WEBSITE DESIGN GUIDELINES

Way2Cure
Senior Marketplace

Care at home, now with everything seniors need.

How the Way2Cure marketplace should look, sound and work, so every page feels like one trusted brand.

Version 1.0 · Mumbai, Navi Mumbai & Thane · way2cure.com

Brand at a glance

Who we are

Way2Cure is a trusted home healthcare platform. The marketplace extends it into one place for medicines, devices, daily care and home services for seniors and their families.

Our promise

"Your Health, Our Mission. Your Comfort, Our Vision."

Marketplace line (new): Care at home, now with everything seniors need.

Brand personality

Caring
Warm and human, never clinical or cold.

Trustworthy
Verified, licensed, transparent.

Simple
One tap, one step, plain words.

Dignified
Respects independence of seniors.

Who we design for

- Seniors (60+) who want large text, few steps and clear buttons.
- Adult children & family who often order for parents, from the phone, often anxious.
- Caregivers & partners (pharmacies, sellers) who need simple dashboards.

Voice & tone

We sound like a calm, knowledgeable nurse who is also your neighbour: clear, kind, reassuring.

Do

- Short sentences, everyday words ("Tear one, take the dose").
- Say what happens next ("Pharmacist will call you if unclear").
- Use "you" and "your family". Speak to the person who is ordering.
- Be honest about limits ("Prescription needed").

Don't

- Medical jargon without a plain explanation.
- Fear, urgency tricks or fake countdown timers.
- Promises of cures or guaranteed outcomes.
- Slang, jokes or "cute" text near health or money.

Examples

BUTTON

Order medicines

not "Submit"

EMPTY CART

Your cart is empty. Start with your regular medicines.

not "Nothing here"

ERROR

That did not go through. Your money is safe. Please try again.

not "Error 500"

DELIVERY

Arriving today by 6 pm. Share the OTP with the rider.

not "Order dispatched"

Logo usage

Way2Cure

MARKETPLACE

Illustration only. Always use the official logo file from the website (logo.png) for production.

Way2Cure

MARKETPLACE

On deep green, use the white or reversed logo.

Clear space

Keep empty space equal to the height of the "W" on all sides.

Minimum size

Header: 36 px high on mobile, 44 px on desktop. Never below 28 px.

Backgrounds

Cream, white or deep green only. No photos behind the logo without an overlay.

Never

Stretch, recolour, add shadows or effects, or place it on terracotta or mustard.

Tip: use "Way2Cure" in the header and add "Marketplace" only as a small label, so it stays one brand with the home care website.

Colour palette

Deep Green
#114D4A · RGB 17 · 77 · 74

Headings, header, footer, primary buttons

Terracotta
#E07B5F · RGB 224 · 123 · 95

Accent shapes, icons, highlights (not for small text)

Terracotta Deep
#B8472A · RGB 184 · 71 · 42

NEW: text links, "Rx" tags, warning buttons

Sunrise Mustard
#EAB34B · RGB 234 · 179 · 75

Badges, offers, star ratings. Use green text on it

Sage
#70A9A1 · RGB 112 · 169 · 161

Illustrations, dividers, success states

Mint Mist
#C8D8D5 · RGB 200 · 216 · 213

Info bands, soft panels, borders

Neutrals & usage mix

Cream page #F6F1E9

White card #FFFFFF

Ink text #1F2A2A

Soft grey #5E6B6B

60% cream & white · 25% deep green · 10% mint · 5% accents (terracotta, mustard, sage)

Accessibility rule: white on Deep Green 9.6:1 (pass) · white on Terracotta Deep 5.3:1 (pass) · green on mustard 5.1:1 (pass) · white on original Terracotta only 2.9:1 (fail), so never put small white text on it.

Typography

Aa

Headings: a warm serif

Use Lora Bold (free, Google Fonts). Fallback: Georgia, serif. Gives the friendly, trusted feel seen in the pitch deck.

Aa

Body & UI: a clean sans

Use Nunito Sans or Open Sans (free). Fallback: Calibri, Arial, sans-serif. Very readable at large sizes and on cheap phones.

Type scale (seniors first, so bigger than usual)

H1	Lora Bold	40 / 32 px	Page titles
H2	Lora Bold	30 / 24 px	Sections
H3	Nunito Sans Bold	22 / 20 px	Card titles
Body	Nunito Sans Regular	18 px (min 16)	All paragraphs, 1.6 line height
Button	Nunito Sans Bold	18 px	Never below 16 px
Small	Nunito Sans	14 px	Legal notes, captions only

Rules: left-align text · max 70 characters per line · never use light weights · do not use all-caps for sentences · the Hindi and Marathi versions use Noto Sans Devanagari at the same sizes.

UI components

Buttons (min height 48 px, radius 8 px)

Order medicines | Book a nurse | View details | Disabled

Primary = green · Booking / urgent action = deep terracotta · Secondary = outline. One primary button per screen section.

Rent

Form field

Phone number

Label always above the field, 2 px green border, red/terracotta message below on error.

Info band & cards

A registered pharmacist verifies every prescription order.

Sorted by time
Morning to night

Cards: white, 4–5 px colour edge, soft shadow, 12 px gap. Use the colour edge to show the category.

Spacing: 8 px grid (8 · 16 · 24 · 32 · 48). Corners: 8 px buttons, 12 px cards. Icons: rounded line icons, 2 px stroke, green or terracotta.

Website structure

Keep the existing Way2Cure site (home care) and add the marketplace under one menu, so families see a single brand.

Home | Shop | Care Services | Subscriptions | Upload Prescription | About | Contact

Top bar: phone 7400400908, WhatsApp, language switch (English · Hindi · Marathi), search, cart, login. Prescription upload stays a bright button for everyone.

Shop

- Medicines
- Medical devices
- Daily care
- Mobility & recovery
- Nutrition & wellness
- Safety & smart tech
- Rent equipment
- Marketplace sellers

Care Services

- Nurse at home
- Doctor at home
- ICU at home
- Ventilator care
- Stroke care
- Cancer care
- Elder, baby & bedridden care

Subscriptions

- Medicine refills
- Diaper delivery
- Health checks at home
- Dose sachets (pill packs)
- Manage / pause plan

Account & Help

- My orders & tracking
- Prescriptions
- Family profiles
- Addresses & payments
- Help centre / FAQ
- Safe-zone band (dementia)
- Legal & privacy

Mobile: bottom bar with Home · Shop · Rx · Care · Account. Prescription upload is mobile app only (per proposal); on the web, show "Open in the app" with a QR code.

Homepage blueprint

1 Header	Logo · search · phone · WhatsApp · cart · language
2 Hero	"Care at home, now with everything seniors need." + 2 buttons: Order medicines · Upload prescription (app)
3 Quick paths	6 big tiles: Medicines · Devices · Daily care · Mobility · Nutrition · Book a nurse
4 How prescriptions work	Upload → AI reads → Pharmacist verifies → Delivered (OTP)
5 Care at home	Nurse · Doctor · ICU · Specialised care cards with "Book now"
6 Subscribe & save	Refills · Diapers · Health checks · Dose sachets
7 Trust strip	15K+ happy patients · verified nurses · licensed pharmacies · 24/7 support
8 Reviews & FAQ	Real family stories (with permission) · FAQ
9 Footer	Support · Company · Visit us (Vashi) · legal links

Design notes

- Show the phone number and Upload Rx without scrolling.
- One idea per section, lots of white space.
- Photos of real caregivers and families. Warm, natural light. No stock hospital images.
- Sticky "Call us" button on mobile.
- Counters (15K+ patients) use real numbers only.
- Keep the page under 3 seconds on 4G.

Key marketplace pages

Category page

- Large product tiles, 2 per row on mobile
- Filters: brand, price, "Buy or rent", Rx / no Rx
- Sort: popular, price, delivery time
- Pin chronic-care items at top

Product page

- Big photo, price, delivery time to pincode
- Rx badge + "Upload prescription" if needed
- Seller badge: Way2Cure or Verified seller
- Buy / Rent / Subscribe options, simple FAQ

Cart & checkout

- Guest checkout with phone OTP
- Address, delivery slot, UPI / card / net banking
- Order summary always visible
- Reorder in one tap from past orders

Prescription flow

- 4 steps: Upload · Confirm list · Pharmacist check · Delivery
- Show AI-read medicines as an editable list
- Say clearly: "AI assists, pharmacist decides"
- Status tracking with SMS / WhatsApp updates

Care booking

- Pick service, date, time and location
- Show what is included and typical duration
- Doctor-led care plan for specialised care
- Confirm by call or WhatsApp

Subscriptions

- Plan card: what, how often, next date
- Pause or change anytime, clearly visible
- Reminder before each order
- Dose sachets view: Morning · Afternoon · Evening · Night

Trust, safety & legal

Always show

- "Prescription medicines sold only with a valid prescription" near every Rx item.
- Pharmacist-verified and licensed pharmacy details (licence no. in the footer).
- Seller verification note on marketplace products.
- "AI assists, pharmacist decides" wherever AI reads a prescription.
- Care services: "Suitability is assessed by the treating doctor."

Never do

- No Schedule X or narcotics on the platform.
- No health claims or "cure" promises in banners.
- No fake urgency, fake discounts or hidden fees.
- No pushing Rx medicines with discount badges.
- No tracking or sharing health data without consent.

Trust elements to place on pages

Verified nurses
Background-checked

Licensed pharmacies
Mumbai partners

Secure payments
UPI · cards · net banking

Private data
Consent-based, DPDP-ready

24/7 support
Call 7400400908

These are design guidelines, not legal advice. Have your lawyer and pharmacy partners confirm labels, Schedule H/H1 handling, device rules and privacy wording before launch.

Senior-friendly & accessibility

Big and clear

Body text 18 px. Buttons 48 px high or more. Space of 12+ px between tap targets.

High contrast

Aim for WCAG AA (4.5:1) or better. Never use colour alone to show meaning.

Few steps

Max 4 steps in any flow. Save progress. Allow "call me to order".

Your language

English, Hindi and Marathi. Language switch in the header, not hidden.

Works on any phone

Mobile-first, light pages, works on slow networks.

Help at hand

Call and WhatsApp on every page. Plain error messages, no dead ends.

Keyboard & screen readers

Alt text on images, labels on fields, visible focus outline.

Calm motion

No auto-playing videos or sliders. Respect "reduce motion" settings.

Test with real seniors (60+) and family caregivers before launch. Watch them place one order and book one nurse without help.

Imagery, icons & motion

Photography

- Real seniors, caregivers and families in Indian homes
- Warm daylight, natural smiles
- Show dignity and independence, not illness
- Get written consent for every photo

Icons & illustration

- Rounded line icons, 2 px stroke
- Colours: deep green, with terracotta or mustard accent
- Simple flat shapes, circles and soft curves (like the pitch deck)
- Pill, sachet and home shapes as brand motifs

Motion

- Gentle fades, 200 ms
- No parallax or bouncing
- Progress bars for order and Rx status

Time-of-day dose colours (for the sachet feature)

Morning	Afternoon	Evening	Night

Use these same four colours in the app, website and printed sachets so seniors learn the pattern once. Also add a word label so it works for colour-blind users.

Build checklist & roadmap

Phase 1 · Months 1–3

- Set colours, fonts, components in the theme
- Catalogue, product & category pages
- Prescription upload (app) and ordering
- Trust strip, legal pages, FAQ

Phase 2 · Months 4–6

- Pharmacy partner dashboards
- Payments and delivery tracking (OTP)
- Subscriptions: refills, diapers, health checks
- Care booking pages

Phase 3 · Months 7–9

- Third-party seller onboarding
- Seller badge & commission rules
- Scale across Mumbai, Navi Mumbai, Thane
- Reviews and ratings

Phase 4 · Later

- White-label theme (own logo & colours)
- Partner dashboards and reports
- Safe-zone band pages
- More cities

Fix before launch on the current site

- Replace the placeholder text in the FAQ ("Can I reschedule or cancel an appointment?" currently shows dummy text).
- Correct small typos in the booking form ("Insentive Care" → "Intensive Care") and the footer note "No content is added yet".
- Use one logo file consistently and pass colours through site-wide settings so white-label is easy later.
- Add a visible link from the home care site to the marketplace and back.

Final test: can a 65-year-old order a medicine in under 2 minutes, and can their son in another city book a nurse in under 3?
